Summary

Java Backend Developer focused on building backend applications using Java and Spring Boot. Experienced in developing RESTful APIs, working with PostgreSQL and Hibernate, and implementing application security with Spring Security. Familiar with Docker, Linux server administration, and CI/CD workflows. Currently pursuing an Associate Degree in Computer Software and continuously developing practical skills through real-world projects such as CodePardis.

Education

Elm-o-Sanat Technical High School — High School Diploma
Computer Software and Network — Iran, Karaj • Sep 2022 – Jun 2025

Islamic Azad University — Associate Degree
Software Engineering — Dec 2026 – Present

Skills

Ubuntu, Bash, SSH

Nginx
Beginner

Projects

CodePardis — Sep 2026 – Present

CodePardis is a full-featured web platform powered by a custom-built Content Management System (CMS), designed to provide flexible content management and a scalable foundation for future growth.

- Designed and developed a custom CMS for managing website content and resources.
- Built secure RESTful APIs using Java and Spring Boot.
- Implemented authentication and role-based access control with Spring Security.
- Designed and managed relational databases using PostgreSQL, Hibernate, and Flyway.
- Containerized application services using Docker.
- Automated build and deployment workflows using GitHub Actions.
- Deployed and maintained the application on a Linux server using Nginx.
